

REPORT

Breeze Series Product Introduction

Aesthetic choice

As work patterns continue to evolve, we become more active and frequently switch from individual to collaborative work. To this end, we need tools that can match this flexible working style. To meet this need, designers set out to design a multi-functional chair to match people with this flexible working style.

FOSHAN BONAI FURNITURE CO.,LTD.
NO.5 CHAOHAI ROAD, XIQING INDUSTRIAL PARK, LONGJIANG TOWN,
SHUNDE DISTRICT, FOSHAN CITY, GUANGDONG PROVINCE, CHINA

Sample Description : 6240 CHAIR
Item No. : 6240
Manufacturer : FOSHAN BONAI FURNITURE CO.,LTD.
Country of Origin : CHINA

As above test item and its relevant information regarding to the submission are provided and confirmed by the applicant. SGS is not liable to either the test item or its relevant information, in terms of the accuracy, suitability, reliability or/and integrity accordingly.

Sample Receiving Date : Jun 09, 2023
Sample 1st Resubmission Date : Jul 20, 2023
Sample 2nd Resubmission Date : Jul 28, 2023
Sample 3rd Resubmission Date : Aug 09, 2023
Test Performing Date : Jun 09, 2023 to Aug 11, 2023
Test Performed : Selected test(s) as requested by applicant

Test Result Summary

No.	Test(s) Requested	Result(s)	Comments
1	Backrest Strength Test - Static - Type I and II, Impact Test, Arm Strength Test - Vertical - Static, Backrest Durability Test - Cyclic - Type II and III and Base Test - Static of ANSI/BIFMA X5.1-2017 (R2022)	PASS	/

Passing multiple tests

How to make a functional chair affordable and ensure high quality is indeed a challenge. However, Bonnet overcame this problem. Products are designed to stand the test of time and pass industry-leading testing and certification standards.

Wide Angle free spins

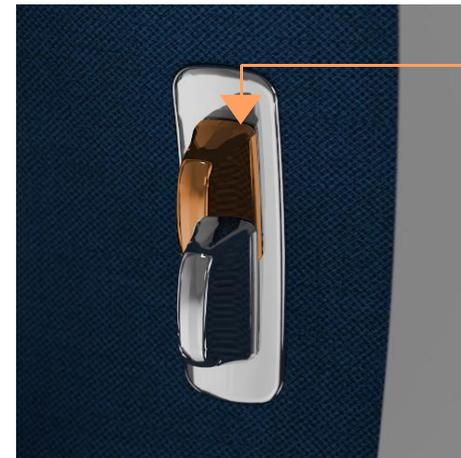

The headrest is inconspicuous in appearance but surprisingly powerful. The headrest cleverly integrates the two adjustment logics of lifting and rotating. The headrest lifting adjustment range is 5CM, which greatly meets the application needs of different groups of people and different scenarios.

Adjustable lumbar support

Dynamic support force

Everyone in the office should always pay attention to their spine curve and maintain a correct sitting posture while receiving scientific support. The built-in adjustable lumbar support provides curved support for the back. The upper and lower movement range of the lumbar support is 4CM to adapt to different users.

Button control of lumbar support lifting

Flexible armrest Follow your heart

Flexible armrests provide ergonomic support while allowing users to work more conveniently. The armrest surfaces independently pivot and slide forward and backward, bringing users closer to the work surface for increased focus and productivity. The armrest can also be raised and lowered by 8.5CM to adjust the height of the armrest to ensure appropriate support for your elbows.

Multi-angle tilt Stay Productive

The same chair can be adapted to different users, providing them with tailor-made comfort for all-day movement and sitting in just seconds. Different tilt angles can be selected with simple controls.

*Chassis left operating handle

Smart matching

Suitable for more users

In order to optimize performance, the most suitable comfort is tailor-made for you. For tall and strong users, a functional design is provided where the seat panel can slide forward and backward. Simple, intuitive adjustments and you'll feel like they were made just for you.

*Chassis left operating handle

Forward Support Comfortable for long periods of sitting

Supporting work while seated starts with a flexible yet supportive design. The seat adopts an obtuse angle, flexible seat edge and forward support design. The interior is made of high-density shaping foam to ensure that there will be no "collapse" phenomenon during long-term use. It also supports different body types and is stress-free in various sitting postures.

*Operating handle on the right side of the chassis

Free lifting

Dynamic comfort

Each chair needs to take into account the relationship between the individual and the surrounding environment, allowing them to freely use the functions of the chair to work and communicate with others. The seat can be raised and lowered freely, providing you with an ideal field of vision and range of motion, allowing you to maintain a healthy sitting posture.

*Operating handle on the right side of the chassis
