## Telephone booth external power socket and network socket

This is our external power socket and network socket, both of which are pre-installed in our factory. The standard length of the power cord is 3 meters, and any special requirements should be specified when placing the order. The type of power socket is configured according to the customer's needs, as the pin configuration for power cords varies by country.

## 24DB exhausting fans

- For the S/M booth, we with 2x900RPM fans with a capacity of 80CFM. The airflow can be controlled via a touch screen.
- For the L/XL Booth, the ceiling is equipped with 4x900RPM fans. The airflow can be controlled through a touch screen. The fans are very quiet, with a noise level of 24DB.

## Heavy-duty casters with adjustable glides

These are the load-bearing wheels for our office pods, with each wheel supporting a load of 380KG and a total height of 85H, featuring adjustable feet. Whether it's for a conference pod or a home office pod, they can be easily moved. The adjustable feet allow for easy height adjustment of the phone booth, ensuring overall levelness.

## Heavy-duty hinge with a load capacity of 200KG

This is an adjustable heavy-duty hinge, with a load rating of 200kg/hinge. Each acoustic pod requires 3 hinges. The surface treatment of the hinge is PVDF painting.
